Deepali Kasaudhan

Front-End Developer (React)| HR & Creative

Professional Summary

Front-End Developer (React)| HR & Creative

A dynamic Front-End Developer skilled in React.js, HTML, CSS, and JavaScript, crafting high-performance, user-centric web experiences. Beyond coding, I bring HR and creative expertise in meeting hosting, data management, ID card design, advertising, AI video production, and Microsoft Office tools, blending tech and creativity for impactful solutions.

Experience

Herambs Group Of Services

HR Assistant | March 2024 – November 2024

Managed administrative tasks, employee onboarding, and documentation, ensuring smooth HR operations. Assisted in organizing meetings, maintaining employee records, and supporting overall workforce management.

RIO International Pvt. Ltd.

IT Sector | November 2024 – Present

Currently, I am working in the IT sector at **Rio International**, where I handle ID card design, records management, meeting coordination, advertising poster creation, AI-generated video production, and website development to enhance digital presence and operational efficiency.

Projects

Netflix Website

A sleek and modern Netflix-inspired website built using HTML and CSS with a unique design. It features an eye-catching homepage, a stylish movie/show grid, and a responsive layout for a smooth user experience. The project is designed to be fast, visually appealing, and completed within 1 day.

Bewakoof

A unique and stylish e-commerce website inspired by Bewakoof.com, built with HTML, CSS, and JavaScript. It features an attractive homepage, product listings, a cart & checkout system, user authentication, and a responsive design with smooth animations. The project aims to deliver a fast and engaging shopping experience within 7 days.

Bulefly Website

A modern and stylish e-commerce website inspired by Bewakoof.com, built using React, CSS, and JavaScript. It features a unique UI, product listings, cart & checkout, user authentication, and smooth animations. Designed for a fast, responsive, and engaging shopping experience, completed in 7 days.

Urban Website

A trendy and modern e-commerce website inspired by Urban-style designs, built using React, CSS, and JavaScript. It features a unique UI, stylish product listings, a cart & checkout system, user authentication, and smooth animations. The project focuses on a fast, responsive, and engaging shopping experience, completed in 7 days.
